Other Methods of Immunosuppression 814
Fundamental Transplantation Immunology 841
Perspectives in Transplantation 933
Summary 967

Itemized Contents

Introduction

The Experiment in Art and Science. *J. J. van Loghem* 1

Surveys of Important Issues in Transplantation

The Genetics of Transplantation Antigens. *J. Dausset* 8
Immunocompetent Cells in Graft Rejection. *Göran Möller* 15
Antigen-induced Immunosuppression for Organ Grafting. *R. Y. Calne* 21
Immunosuppression by Chemical Agents. *Jean-Francois Bach* 27
Antilymphocytic Serum and Its Mode of Action. *M. F. A. Woodruff* 34
Immunological Tolerance and Enhancement: A Common Mechanism. *Raphael H. Levey* 41
Heterotransplantation: Theoretical Considerations. *Keith Reemtsma* 49
Bone Marrow Transplantation. *D. W. van Bekkum* 53

Transplantation Antigens/Introductory Symposium

Mixed Leukocyte Cultures and HL-A Antigens. I. Reactivity of Young Fetuses, Newborns and Mothers at Delivery. II. Inhibition by Anti-HL-A Sera. *R. Ceppellini, G. D. Bonnard, F. Coppo, V. C. Miggiano, M. Pospisil, E. S. Curtoni and M. Pellegrino* 58
Genetic Control of the Human HL-A Histocompatibility System: Alternatives to the Two Sublocus Hypothesis. *Bernard Amos* 71
Weak Transplantation Barriers. *W. H. Hildemann* 76
Possibility of a Third Sublocus. *F. Kissmeyer-Nielsen, A. Svejgaard and E. Thorsby* 81
Mixed Lymphocyte Cultures and HL-A. *V. P. Eijsvoogel, P. T. A. Schellekens, B. Breur-Vriesendorp, L. Koning, C. Koch, Aad van Leeuwen and J. J. van Rood* 85
Cross-reactions in Mammalian Transplantation—With Particular Reference to Streptococcal Antigens and Antibodies. *F. T. Rapaport, R. M. Chase, Jr., A. S. Markowitz, R. T. McCluskey, I. Shimada and K. Watanabe* 89

Human Transplantation Antigens/Genetics

Genetics of Four New HL-A Specifications in the Caucasian and Negro Populations. *E. D. Albert, M. R. Mickey and P. I. Terasaki* 95
Polymorphism of the HL-A System. *E. Thorsby, L. Sandberg, A. Lindholm, W. Mayr, F. Jorgensen and F. Kissmeyer-Nielsen* 101
HL-A Haplotypes and Their Inheritance. *A. Svejgaard, M. Hauge, F. Kissmeyer-Nielsen and E. Thorsby* 105

Further Studies of HL-A. *Peter J. Morris, Alan Ting and John F. Forbes* 109
Cytotoxins in Disease. V. Various Diseases. *M. Kreisler, S. Naito and P. I. Terasaki* 112
Comparisons of Mixed Leukocyte Reactions With Skin Graft Survival in Families Genotyped for HL-A. *H. F. Seigler, F. E. Ward, D. B. Amos and D. L. Stickel* 115
Anomalous MLR Responsiveness Among Siblings. *E. J. Yunis, J. M. Plate, F. E. Ward, H. F. Siegler and D. B. Amos* 118
International Agreement on a Microtechnique of Platelet Complement Fixation (Pl. C Fix.). *J. Colombani, J. D'Amaro, B. Gabb, G. Smith and A. Svejgaard* 121

Clinical Relevance

Cross-matching for Organ Transplantation. I. The Use of Kidney Cells and Immune Adherence. *James C. Pierce and David M. Hume* 127
Achievements and Limitations of Histocompatibility Testing for Ten HL-A Factors in Kidney Transplantation. *Herbert A. Perkins, Samuel L. Kountz, Rose Payne and Folkert O. Belzer* 130
Further Studies on Influence of HL-A Incompatibility on Cadaveric Renal *Transplantation. J. R. Batchelor, V. C. Joysey and P. E. Crome* 133
HL-A Antigens of the Human Renal Glomerulus. *W. E. Braun and J. J. Murphy* 137
Net Histocompatibility Ratios (NHR) for Clinical Transplantation. *C. G. Halgrimson, F. T. Rapaport, P. I. Terasaki, K. A. Porter, G. Andres, I. Penn, C. W. Putnam and T. E. Starzl* 140
Lymphocyte Isoantibodies in Autoallergic and Dysgammaglobulinemic States. *Harold Waters, George S. Smith, Ben Fishkin, K. R. Tanaka and Roy L. Walford* 145
Effects of Cryogenic Storage on Human Lymphocytes. *Elias Cohen, Shirley G. Gregory and Arthur W. Rowe* 149

Transplantation Antigens of Other Species/Genetics

Role of DL-A System of Canine Histocompatibility in Cardiac Transplantation. *A. D. Boyd, F. T. Rapaport, J. W. Ferrebee, F. B. Cannon, J. Dausset, R. R. Lower and F. C. Spencer* 152
Histocompatibility in Orthotopic Heart Transplantation in Dogs. *E. Bos, K. Meeter, J. Stibbe, H. M. Vriesendorp, D. L. Westbroek, M. J. de Vries, J. Nauta and J. J. van Rood* 155
Histocompatibility and Allograft Rejection in Canine Small-bowel Transplants. Evidence for the Existence of a Major Histocompatibility Locus in the Dog. *D. L. Westbroek, C. Rothengatter, H. M. Vriesendorp, J. J. van Rood, R. G. J. Willighagen and M. J. de Vries* 157
Relation of Canine Histocompatibility Testing to Marrow Grafting. *Robert B. Epstein, Rainer Storb and E. Donnall Thomas* 161
RtH-1 Antigens in 39 Rat Strains and Six Congenic Lines. *O. Stark, V. Kren and E. Günther* 165

Classification of Inbred Rat Strains for Ag-B Histocompatibility Antigens. *Joy Palm* 169
Histocompatibility Requirements of Heart and Skin Grafts in Rats. *Clyde F. Barker and R. E. Billingham* 172
Genetic Organization and Evolution of the Mouse H-2 Region: A Duplication Model. *D. C. Shreffler, C. S. David, H. C. Passmore and J. Klein* 176
Regeneration of Transplantation Antigens on Mouse Cells. *Benjamin D. Schwartz and Stanley G. Nathenson* 180
Evidence That H-2 Private Specificities Can be Arranged in Two Mutually Exclusive Systems Possibly Homologous With Two Subsystems of HL-A. *G. D. Snell, M. Cherry and P. Démant* 183
In Vivo Lymphocyte Transformation Induced by Differences at Non-H-2 Loci. *Diana M. Popp and M. L. Davis* 187
Determination of Histocompatibility Antigens by Leukocyte Typing in Outbred Guinea Pigs and Effect of Matching on Skin Graft Survival. *A. L. de Weck, L. Polak, W. Sato and J. R. Frey* 192
Corneal Transplantation and Histocompatibility in Rabbits. *S. Ahrons and N. Ehlers* 195

Other Considerations

Spatial Relationships of Rat Histocompatibility Antigens. *Charles W. DeWitt, John H. McDonald and Carol Miller* 198
Detection of Weak Histocompatibility Antigens on Mouse Peritoneal Macrophages. *W. J. De Angelis and G. Haughton* 202
Modified Antigenicity: An Immunologic Mechanism for Species Survival. *Delta E. Uphoff* 207
Histocompatibility Relationships Between Species. *David H. Sachs, Henry J. Winn and Paul S. Russell* 210
Phylogeny of Transplantation Immunity: Graft Rejection in Earthworms. *Edwin L. Cooper* 214
Effects of Diverse Tissue Implants on the Survival of Subsequent Skin Allografts Transplanted Across Weak Histocompatibility Barriers in Newts and Mice. *William M. Baldwin, III, and Nicholas Cohen* 217

Chemistry of Transplantation Antigens

Implication of Carbohydrate in the Immunochemical Determinant Area of HL-A Substances. *A. R. Sanderson, P. Cresswell and K. L. Welsh* 220
Solubilization of Human Histocompatibility Substances. *Edward E. Ethridge and John S. Najarian* 224
Quantitative Serologic Parameters of Purified HL-A Antigens. *B. D. Kahan, M. A. Pellegrino, B. W. Papermaster and R. A. Reisfeld* 227
Soluble Mouse Histocompatibility Antigens. *R. Koene, I. F. C. McKenzie, E. Painter, D. H. Sachs, H. J. Winn and P. S. Russell* 231
Properties of HL-A Alloantigens Solubilized by Chemical Techniques. *Dean L. Mann and John L. Fahey* 234
Identical Physiochemical Properties of Three Soluble HL-A Substances From Human Liver or Spleen. *G. Molea and A. R. Sanderson* 237

Quantitation of HL-A Antigens on Cell Surfaces. *Zoltan J. Lucas* 240
Sensitization to Water-soluble HL-A Antigens. *Brigid C. Leventhal, Dean L. Mann and C. Nicholas Rogentine, Jr.* 243
Characterization of the Immunogenic and Serological Activity of Soluble H-2 Transplantation Antigens in the Mouse. *S. Strober, E. Appella and L. W. Law* 246
Immunogenic Properties of Papain-Solubilized Alloantigen. *Ralph J. Graff and Stanley G. Nathenson* 249
In Vitro Induction of Allograft Immunity With Mouse Microsomal Lipoprotein Transplantation Antigens. *T. Simmons and L. A. Manson* 253
Conditioning of Allogenic Mice with Crude and Purified H-2 Extracts, Alone and Combined With Cyclophosphamide, for Skin Graft Prolongation. *O. Halle-Pannenko, M.-C. Martyé and P. Joliès* 257

Tissue and Organ Transplantation/Introductory Symposium

The Value of Present Methods Used for the Selection of Organ Donors. *J. Hamburger, J. Crosnier, B. Descamps and D. Rowinska* 260
Role of Preservation in Clinical Renal Transplantation. *Folkert O. Belzer* 268
Long-term Tissue and Organ Preservation. *Kenneth W. Sell* 274
The Clinical Use of ALG. *W. Brendel* 280
Diagnosis and Management of Rejection in Allografted Kidneys. *John P. Merrill* 287
Recent Developments in the Legal Aspects of Transplantation in the United States. *Alfred M. Sadler, Jr., and Blair L. Sadler* 293
Structure and Function of the Organ Transplant Registry of the American College of Surgeons. *John J. Bergan* 298
Transplant Survival and Patient Activity Data From the Human Kidney Transplant Registry. *Benjamin A. Barnes, Joseph E. Murray and John C. Atkinson* 303
Indications for Orthopic Liver Transplantation: With Particular Reference to Hepatomas, Biliary Atresia, Cirrhosis, Wilson's Disease and Serum Hepatitis. *T. E. Starzl, G. Giles, J. R. Lilly, H. Takagi, G. Martineau, G. Schroter, C. G. Halgrimson, I. Penn and C. W. Putnam* 308
Current State of Lung Transplantation. *F. Derom* 313
Current State of Pancreatic Allotransplantation. *Richard C. Lillehei, Richard L. Simmons, John S. Najarian, Carl M. Kjellstrand and Frederick C. Goetz* 318
Bone Marrow Graft in Man After Conditioning by Antilymphocytic Serum. *G. Mathé, J. L. Amiel, L. Schwarzenberg, J. Choay, P. Trolard, M. Schneider, M. Hayat, J. R. Schlumberger and C. Jasmin* 325
Current State of Clinical Heart Transplantation. *R. R. Lower, W. H. Graham, K. E. Thomas, G. L. B. Grinnan, H. A. Kontos and V. E. Kemp* 333
Result of Human Heart Transplantation at Stanford University. *E. B. Stinson, R. B. Griepp, E. Dong, Jr., and N. E. Shumway* 337

Clinical Organ Transplantation

Renal Transplantation in Patients With Australia Antigenemia. *W. Reed, Z. J. Lucas, R. Kempson and R. Cohn* 343

Evaluation of Cadaver-Donor Renal Transplantation. *A. G. R. Sheil, J. H. Stewart, J. R. Johnson, J. May, J. Charlesworth, S. Kalowski, A. M. Sharp and H. Bashir* 347
Characteristics of Erythropoiesis Following Human Renal Homotransplantation. *J. H. Jepson, N. K. M. de Leeuw, M. H. Gault, J. B. Dossetor and B. Manasc* 353
Renal Transplantation in Infants and Small Children. *R. K. Lawson, R. A. Campbell and C. V. Hodges* 358
Immunological Studies of Proteinuria Following Human Kidney Allotransplantation. *Volker Zühlke and Günther Hermann* 361
Isoimmunization of Hemodialysis Patients: Leukocyte-poor Versus Whole Blood Transfusions. *J. Caseley, V. K. Moses, E. A. Lichter and O. Jonasson* 365
Recurrence of an Original Glomerular Lesion in Three Renal Allografts. *P. Galle, N. Hinglais and J. Crosnier* 368
Histocompatibility Concomitants of the Clinical Course of Renal Homografts. *D. M. Hume, H. M. Lee, J. C. Pierce and G. C. Cobb* 371
Antibodies and Early Human Transplant Rejection. *B. A. de Planque, G. M. Williams, Els Borst-Eilers and D. Hume* 376
Diagnosis of Chronic Rejection After Cardiac Transplantation in Humans. *Donald R. Kahn, Edward A. Carr, Jr., John H. Dufek, Marvin M. Kirsh, Otto Gago, William Y. Moores, Harold A. Oberman, Mary Carroll and Herbert Sloan* 380
Observations on Prolonged Immune Suppression for Human Liver Homografts. *Joseph G. Fortner, Man Hei Shiu, Hans Balner, Curtis B. Wilson, George Sichuk, Nobuhiro Kawano, James T. Holmes and Edward J. Beattie, Jr.* 383
Extracorporeal Irradiation of the Blood: Lymphocyte Transformation Tests and Clinical Results After Renal Transplantation. *Eva Weeke and Søren Freisleben Sørensen* 387
Computer Storage and Use of Medical Records of Human Renal Allotransplants. *M. Legrain, J. C. Gluckman, J. F. Marichal, B. Aimé and R. Küss* 391

Transplantation of Hemopoietic Cells

Time Pattern of Antileukemic Effect of Graft-versus-host Reaction in Mice. *Milivoj Boranić* 394
Review of Bone Marrow Transplants at the Ontario Cancer Institute. *D. Amato, D. E. Bergsagel, A. M. Clarysee, D. H. Cowan, N. N. Iscove, E. A. McCulloch, R. G. Miller, R. A. Phillips, A. H. Ragab and J. S. Senn* 397
Marrow Transplantation in Man Following Cyclophosphamide. *George W. Santos, Lyle L. Sensenbrenner, Philip J. Burke, Michael Colvin, Albert H. Owens, Jr., Wilma B. Bias and Richard E. Slavin* 400
HL-A and Mixed Leukocyte Culture Matched Allogenic Bone Marrow Transplantation in Patients With Acute Leukemia. *Robert G. Graw, Jr., Brigid G. Leventhal, Ronald A. Yankee, G. Nicholas Rogentine,*

Jacqueline Whang-Peng, Mary H. McGinniff, Geoffrey P. Herzig, Roger H. Halterman and Edward S. Henderson 405
Clinical Experience With Bone Marrow Transplantation. Failure and Success. *B. Speck, L. J. Dooren, J. de Koning, D. W. van Bekkum, J. G. Eernisse, F. Elkerbout, J. M. Vossen and J. J. van Rood* 409
Graft-Versus-Host Reactions in Bone Marrow Transplantation. *H. J. Meuwissen, J. Kersey, H. Pabst, R. Gatti, R. Chilgren and R. A. Good* 414
A Common Pathogenesis for the Lesions of Graft-Versus-Host Disease. *J. Wayne Streilein* 418
Antilymphoid Globulin in the Therapy of Secondary Disease. *I. Corneci, T. Adrian, O. Costăchel and A. Feteanu* 422
A New Quantitative GVH Assay: Simultaneous Estimation of Mitostatic and Lymphotoxic Effects of Immunosuppressants. *R. V. Petrov, V. M. Manyko, R. M. Khaitov and L. S. Seslavina* 427
Cellular Interaction Between Thymocytes and Transplanted Marrow Stem Cells. *Joan Wright Goodman* 430
Immune Status of Allogenic Radiation Chimeras. *N. Gengozian, C. C. Congdon, E. A. Allen and R. E. Toya* 434
Ability of Normal Bone Marrow to Restore Second-set Immunity. *Patricia A. L. Kongshavn, W. S. Lapp and E. J. Hinchey* 437

Relevance of Fundamental Immunology to Clinical Transplantation

The Postoperative Transplant Patient. *Joseph E. Murray* 440
Immunofluorescent and Serologic Studies of the Humoral Antibody Response to Cardiac Allotransplantation in Man. *R. D. Rossen, W. T. Butler, A. H. Johnson and K. K. Mittal* 445
In Vitro Quantitation of Lymphocyte and Serum Cytotoxic Activity Following Renal Homograft Rejection in Man. *James S. Wolf, J. C. Fawley and David M. Hume* 449
Correlation of Platelet Aggregation in Canine Renal Allotransplants with Serum Cytotoxic Antibody Following Treatment With Azathioprine. *Rosalin Wu Lowenhaupt, P. Nathan and M. G. Menefee* 453
Lymphocyte Activation During Allograft Rejection. *Evan M. Hersh, William T. Butler, Roger D. Rossen, Robert O. Morgen and Wadi Suki* 457
Role of Passenger Leukocytes in the Rejection of Renal Allografts. *F. P. Stuart, E. Bastien, A. Holter, F. W. Fitch and W. L. Elkins* 461
Cellular Immunity to a Purified Kidney Antigen Assessed by Macrophage Migratory Inhibition and MIF Release by Human Leukocytes. *Hugh D. Melnick and Merman Friedman* 465

Experimental Allotransplantation

Further Analysis of the Mechanism of Prolonged Survival of Canine Renal Allografts. *Simon J. Simonian and Joseph E. Murray* 470
Effects of Retransplantation of Canine Kidneys Into Original Donor After 3-Day Implantation Into Randomly Selected Homologous Host. *T. Shimada, F. T. Rapaport, A. S. Markowitz, K. Watanabe and R. T. McCluskey* 473

Prolonged Survival of Kidney Allografts After Perfusion With RNA or DNA. *Gottfried Lemperle, Wolf Michaelis and Michael Mihatsch* 447
Rejection of Renal and Splenic Autografts. *John R. Ackermann, W. Tyree Finch and Ann B. Frost* 480
Effect of Immunosuppressive Treatment and Leukocyte Antigen Matching on Kidney Allografts in Rhesus Monkeys. *H. W. Dicke, R. L. Marquet, G. A. Heystek and H. Balner* 484
Prevention of Rejection of Porcine Renal Allografts. *R. J. Perper, D. E. Bowersox and T. J .Van Gorder* 488
Delayed Recovery From Acute Tubular Necrosis Following Radiation. *Jonathan L. Meakins, Edwin J. Smith, Bernard S. Aron and J. Wesley Alexander* 494
Experimental Orthotopic Transplantation of the Pancreas. *F. Largiadèr and W. Wegmann* 497
Cholestatic Phenomenon in Hepatic Allograft Rejection in the Primate. *J. A. Myburgh, C. Abrahams, D. Mendelsohn, C. J. Mieny and I. Bersohn* 501
Morphological Features of Kidney and Liver Allografts in the Pig. *P. R. Millard, B. M. Herbertson and R. Y. Calne* 505
Functional Alterations in Pig Liver Allografts. *R. Cortesini, L. Semprebene, B. Baroni, C. Cucchiara and C. Casciani* 509
Heart Graft Arteriosclerosis. *J. C. Kosek, C. Bieber and R. R. Lower* 512
Antibodies in the Serum and on the Heart of Dogs With Cardiac Allografts. *B. S. Goldman, K. H. Shumak, M. D. Silver, J. Cartier, W. Lixfeld, W. G Bigelow and J H. Crookston* 515
Advances in Lung Transplantation. *F. J. Veith, S. S. Siegelman, J. W. C. Hagstrom, K. Richards and S. B. P. Sinha* 519
Feasibility of Simultaneous Bilateral Lung Replantation. *Fikri Alican, Mukadder Cayirli, Erol Isin and James D. Hardy* 524

Experimental Cross-species Transplantation

Relationship Between Structural and Functional Changes in Rejecting Renal Xenograft. *B. S. Linn, J. A. Jensen, V. Pardo, D. Davies and L. Franklin* 527
Xenograft Rejection by Dog and Man: Isolated Kidney Perfusion with Blood and Plasma. *M. F. Mozes, H. Gewurz, A. Gunnarson, A. W. Moberg, N. G. Westberg, T. Jetzer and J. S. Najarian* 531
Modification of Xenograft Response by Selective Plasmapheresis. *F. K. Merkel, M. Bier, C. D. Beavers, W. G. Merriman, C. Wilson and T. E. Starzl* 534
Prolongation of Renal Xenografts by the Simultaneous Sequestration of Preformed Antibody, Inhibition of Complement, Coagulation and Antibody Synthesis. *A. W. Moberg, A. R. Shons, H. Gewurz, M. Mozes and J. S. Najarian* 538
Modification of Hyperacute Xenogeneic Kidney Rejection. *K. Messmer, C. Hammer, W. Land, L. Fiedler, W. P. Klövekorn, K. Holper, G. Lob, D. Merzel and W. Brendel* 542

Renal and Skin Xenografts From Baboons to Macaques: Effect of Antilymphocyte Globulins. *J. M. Dubernard, M. Bonneau, J. Bomel, J. Montagard, M. Blitz, M. Latour, N. Blanc-Brunat, D. Fries, J. C. Brochard, V. Bansillon, G. Bansillon and G. Capodicasa* 545

Cardiac and Skin Heterograft Rejection: Suppression With Antilymphocyte Serum. *W. J. Donawick, C. F. Shaffer, D. C. Dodd, J. W. Buchanan and G. F. Fregin* 551

Rejection Phenomena in Heterotopic Liver Homo- and Heterografts. *C. Jerusalem, M. N. v.d. Heyde, P. Jap, J. W. Reinking, W. J. H. Schmidt, R. Bilski and F. A. Tjebbes* 554

Effect of Heparin, Arvin, Liver Perfusion, and Heterologous Antiplatelet Serum on Rejection of Pig Kidney by Dog. *M. Slapak, M. Greenbaum, W. Bardawil, C. Saravis, J. Joison and W. V. McDermott, Jr.* 558

Xenograft Protection by Low-dose, Antigen-induced Tolerance. *Earl R. Owen* 562

Transfer of Immunity to Transplantation and Tumor Specific Antigens by RNA From Lymphoid Organs of Xenogeneic, Allogeneic and Syngeneic Animals. *Yosef H. Pilch, Kenneth P. Ramming and Peter J. Deckers* 566

Microsurgery in Experimental Transplantation

Allogeneic "Rejection" of In Situ Rat Kidney Using Humoral Antibody. *Albert Straus, Francis Straus, II, and David Roseman* 570

Humoral Factors in Experimental Renal Allograft and Xenograft Rejection. *F. Chavez-Peon, G. Monchik, H. J. Winn and P. S. Russell* 573

Factors Contributing to Survival of Rats Transplanted With Kidneys Mismatched at Major Locus. *J. R. Salaman, M. W. Elves and H. Festenstein* 577

Prolongation of Rat Heart Allografts by Donor Pretreatment With Immunosuppressive Agents. *J. S. Freeman, E. C. Chamberlain, K. Reemtsma and D. Steinmuller* 580

Lung Transplantation in the Rat. *Panayiotis J. Asimacopoulos, Farouk A. S. Molokhia, Christopher A. S. Pegg and John C. Norman* 583

Testicular Transplantation in the Rat. *Sun Lee, Kenneth S. K. Tung and Marshall J. Orloff* 586

Peripheral Nerve Allografts: Modifications of Allograft Reaction Using Experimental Model in Rats. *B. D. Verhoog and D. W. van Bekkum* 591

Age Limit for the Use of Syngeneic Donor Kidneys in the Rat. *C. F. Hollander* 594

Studies on Cortical Necrosis in Renal Grafts. *J. Klassen and F. Milgrom* 598

Primate Cephalic Transplantation: Neurogenic Separation, Vascular Association. *Robert J. White, L. R. Wolin, L. C. Massopust, Jr., N. Taslitz and J. Verdura* 602

Immunology of Anterior Chamber of the Eye. *S. Raju and J. B. Grogan* 605

Elicitation and Expression of Transplantation Immunity in the Uterus. *Alan E. Beer, R. E. Billingham and Robert A. Hoerr* 609

Tissue and Organ Preservation

Successful 24-hour Kidney Preservation With Simplified Hyperosmolar Hyperkalemic Perfusate. *George M. Watkins, Noel A. Prentiss and Nathan P. Couch* 612
Assessment of Renal Function During Isolated In Vitro Perfusion. *Jeffrey L. Benjamin and Kenneth W. Sell* 616
Hyperbaric Kidney Preservation With Gaseous Media. *K. Ruile, A. Rickart, R. Braun and R. Voss* 619
Successful 18- to 23-Hour Canine and Human Kidney Preservation. *G. Le Jeune, J. P. Godon, W. I. Hopkinson, H. Sandront, P. Krakora, J. De Lvigne, Ch. De Chenne and R. Petit* 623
Perfusate Composition in Organ Preservation. *Leslie E. Rudolf, Joseph Hahn and Alice O'Dell* 626
Viability, Function and Transportation of Preserved Canine Kidneys. *William H. Hart and William G. Manax* 630
Successful 24-Hour Experimental Kidney Preservation. *J. H. Groenewald, W. H. Weber, J. J. van der Walt, M. J. Greeff and J. J. van Zyl* 634
Successful Transportation of Kidneys Between Distant Centers in North America. *L. E. Stevens, P. I. Terasaki, D. Ricks and K. Reemtsma* 637
Autoperfusing Heart-Lung Preparation: Prolonged Survival by Extracorporeal Symbiosis. *Wilfred Tam, Francis Robicsek, Harry K. Daugherty and Donald C. Mullen* 640
Reliable Method for Preservation and Transportation of Donor Heart. *Charles R. H. Wildevuur, Jaap R. G. Kuipers and Isao Onodera* 643
Experimental Organ Preservation. *K. C. Calman and P. R. F. Bell* 647
Successful Orthotopic Liver Transplantation After Preservation by Simple Hypothermia. *G. M. Abouna, C. G. Koo, L. F. Howanitz, E. Ancarani and K. A. Porter* 650
Simple Method of 24-Hour Spleen Preservation: Further Studies Relating to Hemophilia. *Farouk A. Molokhia, Panayiotis J. Asimacopoulos, Christopher A. S. Pegg and John C. Norman* 654
Studies of Preservation of Liver and Pancreas by Freezing Techniques. *Gerhard Zimmermann, Clarence Tennyson and Theodore Drapanas* 657
Dimethylsulfoxide, Glycerol, and Inositol as Cryophylactic Agents in Preserving Frozen Canine Small Bowell Segments. *F. M. Guttman, K. Sangbhungdhu, G. Berdnikoff, T. Makita and E. B. Sandborn* 660

Transplantation Biology/Introductory Symposium

Induction of Low-zone Tolerance In Vitro. *E. Diener and M. Feldmann* 663
Allogeneic Bone Marrow Transplantation After Elimination of Immunocompetent Cells by Means of Density Gradient Centrifugation. *K. A. Dicke and D. W. van Bekkum* 666
Kidney Transplantation Genetics and Enhancement in Rats. *Yoko Mullen and W. H. Hildemann* 669
Passenger Leukocytes and Induction of Allograft Immunity. *David Steinmuller and Earl A. Hart* 673

Symposium on Tolerance

Use of Homozygous Allogeneic Bone Marrow for Induction of Tolerance With Antilymphocyte Serum: Dose and Timing. *Mary L. Wood, Anthony P. Monaco, James J. Gozzo and Alain Liegeois* 676
Use of Low Doses of Homozygous Allogeneic Bone Marrow Cells to Induce Tolerance With Antilymphocyte Serum (ALS): Tolerance by Intraorgan Injection. *Anthony P. Monaco, James J. Gozzo, Mary L. Wood and Alain Liegeois* 680
Unresponsiveness to Skin Allografts Induced by Tissue Extracts and Antilymphocytic Serum. *L. Brent, J. A. Hansen and P. J. Kilshaw* 684
Tolerance to Skin Allografts by Immunosuppressive "Pulse" of Methylhydrazine Derivatives and Antilymphocyte Serum. *G. L. Floersheim and K. Brune* 688
Host Acceptance of Well-matched Kidney Allograft. *William A. Kisken and Ahmad A. Daouk* 693

Symposium on Enhancement

Immunologic Enhancement of Rat Kidney Grafts: Evidence for Peripheral Action of Homologous Antiserum. *Randall Morris and Zoltan J. Lucas* 697
Active Enhancement of Renal Allografts. *C. E. Zimmerman* 701
Active Enhancement of Renal Allografts in Dog and Rat by Subcellular Antigen. *Richard E. Wilson, Peter R. Maggs, Romain Vanwijck, Thongdee Shaipanich, Robert T. J. Holl-Allen, Peter Lukl and Simon J. Simonian* 705
Specific Inhibition of Organ Allograft Rejection by Donor Blood. *R. L. Marquet, G. A. Heystek and W. J. Tinbergen* 708
Mechanism of Skin Graft Enhancement in the Mouse. *I. F. C. McKenzie, R. Koene and H. J. Winn* 711
Passive Enhancement of Skin Heterografts. *J. Jeekel and D. L. Westbroek* 714
Hematopoietic Origin of Immunological Target in Enhancement of Renal Allografts. *Ronald D. Guttmann and Richard R. Lindquist* 717
The Role of Immunological Enhancement for the Growth of Autochthonous Tumors. *Ingegerd Hellström and Karl Erik Hellström* 721

Immunosuppression/Clinical Trials With Antilymphocyte Serum

Selective Deficiency of Cell-mediated Immunity in Humans Treated With Antilymphocyte Globulins. *J. P. Revillard and J. Brochier* 725
Prolonged Rhesus Skin Allograft Survival Produced by Antihuman Thymocyte Serum. *C. C. Darrow, II, G. S. LaFontaine, J. J. Smith, D. P. Martin, K. W. Sell and D. E. Kayhoe* 730
Increasing Effectiveness of Antilymphocytic Globulin by Prevention of Antibody Formation to Horse IgG. *William T. Butler and Roger D. Rossen* 733
Induction of Tolerance to Horse Gamma Globulin (HoGG) and Antilymphocyte Globulin (HoALG) in Humans and Experimental Animals. *H. Gewurz, A. W. Moberg, L. Johnson, R. L. Simmons and J. S. Najarian* 737

Glomerular Damage After Intravenous Administration of Antilymphocyte Globulin (ALG) in Man and Rhesus Monkeys. *G. Thiel, J. Moppert, H. Mahlich, F. Buhler, T. Vischer, F. Enderlin, H. Weber and H. U. Zollinger* 741

Immunosuppression by Antihuman Lymphocyte Globulin: Correlation of Human and Animal Assay Systems With Clinical Results. *Richard L. Simmons, Allan W. Moberg, Henry Gewurz, Robert Soll and John S. Najarian* 745

Evaluation of Intravenous Route for Administration of Antilymphocyte Globulins in Humans. *J. Traeger, J. L. Touraine, D. Fries and F. Berthoux* 749

Induction of Tolerance to Antilymphocyte Globulin in Man. *Marc E. Weksler, Geoffrey Bull, Gabriel H. Schwartz, Kurt H. Stenzel and Albert I. Rubin* 754

Clinical Experience With Antilymphocyte Globulin (ALG) in Renal Transplantation. *Sharad D. Deodhar, K. Konomi, S. Kakamoto and K. C. Kuruvila* 759

Controlled Clinical Trial of Antilymphocyte Globulin in Human Renal Allografts. *A. G. Birtch, C. B. Carpenter, N. L. Tilney, C. L. Hampers, F. B. Hager, L. Levine, R. E. Wilson and J. E. Murray* 762

Trial of Rabbit Antihuman ALG in Cadaver Kidney Transplantation. *Robert C. Davis, Arthur H. Glasgow, Lester F. Williams, Jr., Donald C. Nabseth, Carl A. Olsson, Gunther W. Schmitt, Beldon A. Idelson, Sidney R. Cooperband, John T. Harrington and John A. Mannick* 766

Antithymocyte Antisera Therapy in Nonsurgical Immunologic Disease. *B. Pirofsky, R. H. Reid, E. J. Bardana, Jr., and C. Bayrakci* 769

De Novo Malignant Tumors in Organ Transplant Recipients. *I. Penn, C. G. Halgrimson and T. E. Starzl* 773

Experimental Studies With Antilymphocyte Serum

Use of Minimal Doses of Lymphoid Cells for Production of Heterologous Antilymphocyte Serum. *James J. Gozzo, Mary L. Wood and Anthony P. Monaco* 779

A Method for Producing Immunosuppressive Antilymphocyte Serum in Pigs and Ruminants. *R. M. Binns, Elizabeth Simpson, Sandra L. Nehlsen and M. Ruszkiewicz* 784

In Vitro Stimulation or Inhibition of Lymphocyte Activation by Antilymphocyte Serum. *J. Brochier and J. P. Revillard* 788

Inactivation of Thymus and Marrow-derived Lymphocytes by Heterologous Antilymphocyte Serum (ALS). *H. F. Jeejeebhoy* 793

Mode of Action of Antilymphocyte Sera (ALS). *N. S. Harris, G. E. Merino and J. S. Najarian* 797

Enhanced Antibody Production to Type III Pneumococcal Polysaccharide in Mice Treated With Antilymphocyte Serum: Evidence for Cellular Regulatory Mechanism of IgM Antibody Response. *Rolf F. Barth, Phillip J. Baker, Philip W. Stashak and Diana F. Amsbaugh* 800

Studies on Time-dependence of Immunosuppressive Effects of Antilymphocyte Serum In Vivo and In Vitro. *K. Nouza, Helena Haskovcova, Jana Sejkorova and M. Nemec* 803

Complications in Prolonged Administration of Antilymphocytic Sera. *R. K. J. Koumans, J. B. Billote and J. F. Burke* 807
Immunosuppression, Virus and Oncogenesis in Mice. *S. L. Nehlsen* 811

Other Methods of Immunosuppression

Allograft Prolongation With Synthetic Progestins. *J. G. Turcotte, R. F. Haines, J. E. Niederhuber and P. W. Gikas* 814
Prolonged Inhibition of Homograft Rejection After Cycloleucine. *Benjamin A. Rubin and Howard Tint* 819
Effect of Incubating Skin in Steroid Suspension (Triamcinolone Acetonide) on Survival of Skin Allografts in Rabbits. *Peter Klauie, Weldon B. Jolley and David B. Hinshaw* 823
L-Asparaginase-induced Inhibition of Transplantation Immunity: Prolongation of Skin Allografts in Enzyme-treated Mice. *Herman Friedman and Asit K. Chakrabarty* 826
Immunosuppressive Effect of Cell-free Extracts From *Escherichia Coli*. *I. D. Kirpatovski and E. S. Slanislavski* 831
Inhibition of Secondary Immune Responses by Immunoregulatory Alpha-globulin. *A. H. Glasgow, S. R. Cooperband, K. Schmid, J. T. Parker, J. C. Occhino and J. A. Mannick* 835
Prolonged Renal Allograft Survival: Extracorporeal Irradiation of Blood. *A. D. Chanana, E. P. Cronkite, D. D. Joel and J. B. Stevens* 838

Fundamental Transplantation Immunology

Reactivity of Nonsensitized Thymocytes to Antigen: Release of Specific Lymphocyte-activating Substances. *R. E. Falk, J. A. Falk and J. B. Zabriskie* 841
Soluble Adherent Cell Activity Permitting Purified Lymphocyte Response. *M. L. Bach, B. Alter, D. Zoschke and F. H. Bach* 844
Nature of Antigen Recognition Site in Cellular Immunity. *Noel L. Warner* 848
Allogenic Nucleated Cells as Immunogen and Target for Plaque-forming Cells in Mice. *H. Fuji, M. Zaleski and F. Milgrom* 852
A Sensitive Assay for Transplantation Immunity in Mice. *P. Lake, E. Sabbadini and A. H. Sehon* 856
Prolonged Skin Allograft Survival Achieved by In Vivo Cooling. *A. I. Daniller, D. L. Ballantyne, Jr., and J. M. Converse* 860
Rejection of Skin Allografts by Irradiation Chimeras: Evidence for Skin-specific Transplantation Barrier. *E. M. Lance, E. A. Boyse, S. Cooper and E. A. Carswell* 864
Host Repopulation of Endothelium. *G. M. Williams, Carol A. Krajewski, F. J. Dagher, A. M. ter Haar, J. A. Roth and G W. Santos* 869
Sensitivity of Mixed Lymphocyte Reaction and Its Correlation With Skin Graft Survival. *Richard J. Mangi and Michael R. Mardiney, Jr.* 873
Allograft Immunity In Vitro. IV. Proliferative Response and Effector Mechanism in Mixed Cultures of Mouse Blood Lymphocytes. *P. Häyry, M. Virolainen and V. Defendi* 876
Relevance of Mixed Lymphocyte Reactions to Renal Allograft Rejection Mechanisms. *Richard R. Lindquist and Ronald D. Guttmann* 879

Cycles of Transformation and Differentiation of Lymphocytes In Vitro. *Haim Ginsburg* 883
In Vitro Studies on the Mechanism of Hyperacute Xenograft Rejection. *W. Land, A. Schilling, J. Aldenhoff, R. Lamerz, K. Pielsticker, N. Mendler and W. Brendel* 888
Lymphoid Cells Sensitized In Vitro Against Allogeneic or Syngeneic Fibroblasts Produce Immune Effects In Vitro and In Vivo. *Irun R. Cohen, Amiela Globerson and Michael Feldman* 891
Effect of Neuraminidase on Serological Properties of Murine Lymphoid Cells. *Michael Schlesinger and Bernard D. Amos* 895
Cluster-forming Cells and Response to Skin Allografts. *H. S. Micklem, C. Asfi and N. A. Staines* 898
Controlled, Double-blind Trial of Antiplatelet Aggregating Agents in Vascular Renal Allograft Rejection. *T. H. Mathew, G. P. Hogan, D. T. Lewers, H. Bauer, J. F. Maher and G. E. Schreiner* 901
Heart-reactive Antibody: A Monitor of Cardiac Rejection. *R. J. Ellis and J. B. Zabriskie* 905
Inhibition of Allograft Reaction by Biologically Filtered Antigens. *Y. Taguchi, N. Siddiquie, R. R. Shepherd and K. J. MacKinnon* 908
Microcirculatory Events in Rabbit Ear Allografts Modified by Normal and Alloimmune Rabbit Sera. *H. A. Zarem, G. S. Dimitrievich and L. W. Coppleson* 912
Thymus-derived Cells as Killer Cells in Cell-mediated Immunity. *J. F. A. P. Miller, K. T. Brunner, J. Sprent, P. J. Russell and G. F. Mitchell* 915
Demonstration of Thymic Function In Vitro. *R. Burleson and R. H. Levey* 918
Immunocompetence of Embryonic Hemopoietic Cells After Traffic to Thymus. *Osias Stutman and Robert A. Good* 923
Reversal by Thymosin of Increased Susceptibility of Immunosuppressed Mice to Moloney Sarcoma Virus. *M. A. Hardy, M. Zisblatt, N. Levine, A. L. Goldstein, F. Lilly and A. White* 926
Immunosuppressive Alpha Globulin From Bovine Thymus: Mechanism of Action. *C. B. Carpenter, S. M. Phillips, A. W. Boylston and J. P. Merrill* 929

Perspectives in Transplantation

Eurotransplant. *J. J. van Rood, J. Freudenberg, A. van Leeuwen, H. M. A. Schippers, R. Zweerus and J. L. Terpstra* 933
Mixed Leukocyte Cultures in Transplantation Immunology. *Fritz H. Bach and Marilyn L. Bach* 942
Perspectives of Immunosuppression. *H. Balner* 949
Perspectives of Immunological Tolerance in Transplantation. *N. A. Mitchison* 953
Immunological Enhancement. *Paul S. Russell* 960

Summary

Summary of the Third International Congress of the Transplantation Society: A Personal Approach. *G. J. V. Nossal* 967
Author Index 974

No. 2 (June)

Current Problems in Analysis of Results of Renal Transplantation in Man. *Jean Dausset and Felix T. Rapaport* 979
Appendix. Standard International Code for Analysis of Histocompatibility Data in Renal Transplantation 981
A Bit of Graft. *D Bernard Amos* 984
A Histocompatibility Typing Serum Bank. *D. E. Kayhoe and D. B. Hare* 988
Selection of Donors for Kidney Transplantation. *D. B. Amos, E. E. Anderson, J. F. Glenn, J. C. Gunnells, S. L. Lancaster, J. M. MacQueen, R. R. Robinson, H. F. Seigler, D. L. Stickel, and F. E. Ward* 993
Analysis of 221 Renal Transplants: Influence of Cross-reactions Between Donor and Recipient HL-A Antigens. *J. Dausset and J. Hors* 1004
A Collaborative Scheme for Tissue Typing and Matching in Renal Transplantation. III. A Preliminary Assessment of the Influence of Histocompatibility Matching Grades on the Outcome of Renal Transplantation. *H. Festenstein, R. T. D. Oliver, and J. A. Sachs* 1011
HL-A Typing and Cadaver-Kidney Transplants. *M. Jeannet, A. de Weck, P. Grob, B. Horisberger, F. Largiadèr, and G. Thiel* 1015
Scandiatransplant: Preliminary Report of a Kidney Exchange Program. *F. Kissmeyer-Nielsen, A. Svejgaard, O. Fjeldborg, V. Posborg Petersen, L. Staub Nielsen, F. Lund, E. Clausen, J. Hess Thaysen, E. Kemp, H. Rahbeck Sørensen, E. Thorsby, E. Brodwall, A. Flatmark, F. Bergan, E. Enger, O. J. Malm, L. Sandberg, A. Lindholm, L. E. Gelin, C. Högman, K.-E. Fjellström, L. Thoren, E. Möller, C. Francksson, G. Magnusson, B. Löw, L. Messeter, T. Lindholm, E. Lindstedt, A. Tiilikainen, B. Kuhlbäck, B. Lindström, W. Hiller, W. Bauditz, R. Bünger, and K. Klosterhalfen* 1019
Analyses of Histocompatibility in Cadaver Renal Transplantation. *Peter J. Morris* 1030
Unrelated Kidney Transplants and Matching for HL-A Antigens. *R. Payne, H. A. Perkins, S. L. Kountz, and F. O. Belzer* 1036
Prospects in Host-Donor Matching. *J. J. van Rood, A. van Leeuwen, J. Freudenberg, and P. Rubinstein* 1042
Relationship Between Kidney Graft Prognosis and HL-A Typing Using a Microabsorption Technique. *J. J. van Rood, A. van Leeuwen, S. de Graaf, and J. Mowbray* 1051
Histocompatibility-Transplant Correlation, Reproducibility, and New Matching Methods. *Paul I. Terasaki and M. R. Mickey* 1057
Bone Marrow Grafts and Histocompatibility. *J. L. Amiel, L. Schwarzenberg, and G. Mathé* 1072
Blood Platelets in HL-A Serology. *J. Colombani* 1078
Heterologous Antisera for Human Histocompatibility Testing. *H. Balner, B. W. Gabb, H. Dersjant, W. van Vreeswijk, A. van Leeuwen, and J. J. van Rood* 1088
Matching-Typing Complementarity in Histocompatibility Testing. *Fritz H. Bach, Marilyn L. Bach, and Robert J. Hartzman* 1099

Hyperacute Rejection of Renal Homografts: With Particular Reference to Coagulation Changes, Humoral Antibodies, and Formed Blood Elements. *Hans J. Boehmig, Geoffrey R. Giles, Hiroshi Amemiya, Curtis B. Wilson, Adolf J. Coburg, Edward Genton, Donald L. Bunch, Frank J. Dixon, and Thomas E. Starzl* 1105
Severe Temporary Deterioration of Renal Transplant Function Following Meningococcemia. *N. L. Tilney and J. E. Murray* 1118
Abstracts 1123

No. 4 (September)

Chairman's Introductory Reviews

The Histocompatibility Systems. *George D. Snell* 1133
The Polymorphism of the HL-A System. *Jean Dausset* 1139

Expression of Histocompatibility Antigens on Tumor Cell Membranes

Introduction: Biological Features of Cell Surface Antigens. *Geoffrey Haughton* 1147
The Effect of Neuraminidase on Expression of Cellular Antigens. *Michael Schlesinger and Sima Gottesfeld* 1151
Discussion. B. H. Sanford and J. F. Codington 1155
C. F. McKhann 1156
O. Stutman 1157
C. F. McKhann 1158
C. de Vaux Saint Cyr 1158
R. Motta 1158
R. Walford 1158
Expression of Surface Antigens on Cultured Tumor Cells in Relation to Cell Cycle. *M. Cikes* 1161
Parental Variants. *Eva Klein* 1167

Expression of Virus-controlled Cell Surface Antigens

Introduction. *Leo Sachs* 1173
The Control of Nonvirion Antigens Induced by Papovaviruses. *Fred Rapp and Norman A. Crouch* 1175
The Modification of Immunologe Specificity and Function of Cellular Membranes by Herpesviruses. *Bernard Roizman* 1179
Expression of Moloney Leukemia Virus Controlled Cell Surface Antigen in Relation to Virus Release. *Eva Maria Fenyö* 1185
Tumor-specific Antigens Associated With Aminoazo Dye-induced Rat Hepatomas. *R. W. Baldwin, D. Glaves, J. R. Harris, and M. R. Price* 1189
Discussion. D. Silvestre 1191
G. K. Pasternak 1191

Spatial Distribution of Cell Surface Antigens

Introduction: *U. Hämmerling* 1193
Surface Antigens of Murine Leukemia Cells and Murine Leukemia Viruses. *Tadao Aoki* 1195

Topography of Cell Surface Antigens. *Christopher W. Stackpole* 1199
Ultrastructural Localization of HL-A Antigens at Cell Surface. *F. M. Kourilsky, D. Silvestre, C. Neauport-Sautes, J. Dausset, and J. P. Levy* 1203
Biochemical Aspects of Histocompatibility Antigens. *Stanley C. Nathenson* 1209
Discussion. G. De Thé 1212
C. W. Stackpole 1212
N. A. Mitchison 1212
U. Hämmerling 1212
R. L. Walford 1212
A. Lengerova 1212
Changes in Cell Membrane Biochemistry Upon Transformation in Culture by Tumorigenic DNA Viruses. *Peter T. Mora and Roscoe O. Brady* 1213

Antigenic Expression as an Escape Route From Immunological Rejection

Possible Examples of Antigenic Modulation Affecting H-2 Antigens and Cell Surface Immunoglobulins. *Toshitada Takahashi* 1217
Some Recent Information on "Blocking Antibodies" as Studied In Vitro. *Ingegerd Hellström, Karl Erik Hellström and Hans Olov Sjögren* 1221
Nature of Enchancing-Facilitating Antibodies. *Guy A. Voisin* 1229
Discussion. P. Mora 1231
R. W. Baldwin 1231
C. F. McKhann 1231
J. R. Batchelor 1231
N. A. Mitchison 1231
G. A. Voisin 1231
O. Stutman 1232
D. Oth 1233

Genes Influencing Susceptibility to Tumor Induction

Introduction: Steps in Viral Induction of Tumors. *André Lwoff* 1235
Genes Other Than H-2 Determining Susceptibility to Friend Virus. *Richard A. Steeves* 1237
The Influence of H-2 Type on Gross Virus Leukemogenesis in Mice. *Frank Lilly* 1239
Discussion. O. Stutman 1242
F. M. Kourilsky 1242
F. Rapp 1242
G. Klein 1242
The Role of Genetic Factors in the Combined Neoplastic Effects of Vaccinia Virus and Methylcholanthrene. *Maria L. Duran-Reynals and Frank Lilly* 1243
Histocompatibility Genes and Susceptibility to Mammary Tumor Virus (MTV) in Mice. *O. Mühlbock and Anna Dux* 1247
Inheritance of Susceptibility to Erythrocyte-Borne Bittner Virus in Mice. *S. Nandi, Sandra Haslam, and Cheryl Helmich* 1251
Genetic Resistance to Infection and Oncogenesis by Avian RNA Tumor Viruses. *L. B. Crittenden and W. E. Briles* 1259

Discussion. R. L. Walford 1263
L. B. Crittenden 1263

Choriocarcinoma

Introduction: Histocompatibility and Trophoblastic Neoplasia. *Sylvia D. Lawler* 1265
Current Data on HL-A and ABO Typing in Gestational Choriocarcinoma and Invasive Mole. *Bent Mogensen and Flemming Kissmeyer-Nielsen* 1267
Discussion. J. L. Amiel 1270
K. D. Bagshawe 1270
J. Dausset 1271
F. Kissmeyer-Nielsen 1271

Possible Relationships Between HL-A System and Susceptibility to Cancer in Man

Introduction: Genetic and Epidemiologic Aspects of Cancer. *Robert W. Miller* 1273
HL-A and Hodgkin's Disease. *Peter J. Morris and John F. Forbes* 1275
Discussion. J. L. Amiel 1277
HL-A Antigens in Hodgkin's Disease. *E. Thorsby, Judy Falk, A. Engeseth, and D. Osoba* 1279
HL-A and the Group Five System in Hodgkin's Disease. *J. J. Van Rood and A. van Leeuwen* 1283
HL-A Phenotypes in Hodgkin's Disease Preliminary Report. *F. Kissmeyer-Nielsen, K. Bjørn Jensen, G. B. Ferrara, K. E. Kjerbye, and A Svejgaard* 1287
HL-A Types of 44 Hodgkins Patients. *Anne Coukell, Julia G. Bodmer, and Walter F. Bodmer* 1291
Discussion. J. Bertrams 1294
E. Thorsby 1294
J. Dausset 1294
W. F. Bodmer 1294
G. Klein 1294
P. J. Morris 1294
G. B. De Thé 1294
HL-A Specificities in Acute and Chronic Lymphatic Leukemia. *Roy L. Walford, Edith Zeller, Lisa Combs, and Pat Konrad* 1297
HL-A Antigens in Malignant Diseases. *M. Jeannet and C. Magnin* 1301
Relationship Between the HL-A System and Susceptibility to Diseases. *E. Thorsby and S. O. Lie* 1305
HL-A Antigens in Chronic Myeloid Leukemia (CML) and Chronic Lymphoid Leukemia (CLL). *L. Degos, Y. Drolet, and J. Dausset* 1309
Discussion. S. Lawler 1311
F. M. Kourilsky 1311
R. L. Walford 1311
E. Thorsby 1311
L. Sachs 1311
P. J. Morris 1311

R. L. Walford 1313
W. F. Bodmer 1314
HL-A in Follicular Lymphoma, Reticulum Cell Sarcoma, Lymphosarcoma, and Infectious Mononucleosis. *Peter J. Morris and John F. Forbes* 1315
Critical Analysis of Relationships Between HL-A System and Susceptibility to Disease. *N. Feingold* 1317

Histocompatibility, Immune Response, and Tumor Induction

Relationship Between Histocompatibility Antigens and Immune Response. *Hugh O. McDevitt* 1321
Specific Immune Response Genes. *Baruj Benacerraf, Ira Green, Harry G. Bluesteln, and Leonard Ellman* 1327
Incidence of Benzopyrene-Induced Tumors in Lines of Mice Genetically Selected for "High" and "Low" Antibody Production. *G. Biozzi, C. Stiffel, D. Mouton, Y. Bouthillier, and C. Decreusefond* 1333
Discussion. G. D. Snell 1335
D. Oth 1335
E. Gleichmann 1335
O. Stutman 1336

Recent Advances in Transplantation

Long-Term Survival of Bone Marrow and Kidney Allografts in Irradiated DL-A Identical Dogs. *Felix T. Rapaport, Frances D. Cannon, David A. Blumenstock, Koji Watanabe, and Joseph W. Ferrebee* 1337
Recurrent Glomerulonephritis and Chronic Rejection: Clinical, Immunologic and Histopathologic Correlation. *C. Waterhouse, M. L. Callerame, R. Medalle, J. Vaughan, R. J. Glassock, and A. May* 1343
Skin-Kidney Transplantation Relationships in Genetically Disparate Rats. *Carol S. Schuffler and A. S. Markowitz* 1353
Transplantation Proceedings Abstracts 1357

No. 4 (December)

The Artificial Kidney

Emerging Interrelationship Between Kidney Transplantation and Regular Dialysis. *Belding H. Scribner* 1395
Future Prospects of Artificial Kidney. *Edward F. Leonard* 1405
Biological Considerations of Artificial Kidney. *Constantine L. Hampers* 1411

Cardiopulmonary Support Systems

Current Status of Artificial Lung. *Pierre M. Galletti* 1419
Auxiliary Lung: State of the Art. *E. Converse Peirce, II, Yehuda Tamari, and Fabio Giron* 1423
Prolonged Extracorporeal Respirator Support: Engineering View and Progress Report. *Philip A. Drinker* 1429
Clinical Prolonged Extracorporeal Circulation for Respiratory Insufficiency. *J. Donald Hill, Marc R. deLeval, Leon Dontigny, M. L. Bramson, John J. Osborn, and Frank Gerbode* 1437

The Artificial Heart: Total Replacement. *Michael E. DeBakey* 1445
Removing Limiting Factors for Total Cardiac Replacement. *W. J. Kolff* 1449
Current Status of Intraaortic Balloon Pump and Initial Clinical Experience With Aortic Patch Mechanical Auxiliary Ventricle. *Adrian Kantrowitz, Joseph S. Krakauer, George Zorzi, Melvyn Rubenfire, Paul S. Freed, Steven Phillips, Marc Lipsius, Claudio Titone, Philip Cascade, and Dov Jaron* 1459
Assisted Circulation: Intraaortic Balloon Pumping. *W. Gerald Austen, Mortimer J. Buckley, Eldred D. Mundth, and Charles A. Sanders* 1473
Assisted Circulation With Membrane Oxygenators. *Arnold J. Landé* 1479
Experimental and Clinical Studies in Assisted Circulation. *H. S. Soroff, W. C. Birtwell, R. L. Norton, C. T. Cloutier, K. Kataoka, and F. Giron* 1483
Thrombosis in Artificial Organs. *Edwin W. Salzman* 1491
Cardiopulmonary Support Systems: Problems in Clinical Applications. *Theodore Cooper and Lowell T. Harmison* 1497

Alimentary and Metabolic Life Support Techniques

Long-term Parenteral Alimentary Support. *Jonathan E. Rhoads* 1503
Metabolic Considerations in Treatment of Liver Failure With Particular Reference to Use of Ex Vivo Perfused Pig Liver. *William V. McDermott, Jr. and John C. Norman, Jr.* 1509
Prosthetics in Hepatic Assistance. *B. Eiseman and T. Soyer* 1519
Current Methods for Support of Patients in Hepatic Failure. *D. M. Hume, G. Mendez, W. E. Gayle, D. H. Smith, G. M. Abouna, and H. M. Lee* 1525

Recent Progress in Closely Related Fields

Methods of Resurfacing Denuded Skin Areas. *Basil A. Pruitt, Jr., and Paul Silverstein* 1537
Current Methods of Organ Preservation. *Maurice Slapak* 1547
Xenobanking for Organ Preservation. *Kenneth W. Sell and Jeffrey L. Benjamin* 1557
Progress in Long-term Organ Freezing. *Herndon B. Lehr* 1565

Summation

The Present Status of Artificial Organs Used for the Support of Transplantation: A Summary of the Symposium. *John P. Merrill* 1569

Recent Advances in Transplantation

Tritiated Thymidine Incorporation in Blood Leukocytes of Renal Allograft Recipients. *A. Dimitriu, M. Debray-Sachs, B. Descamps, C. Sultan, and J. Hamburger* 1577
Accelerated Skin Allograft Rejection Following Xenogeneic Sensitization. *Edward E. Etheredge, Alan R. Shons, and John S. Najarian* 1585
Hepatic Support Therapy by Intermittent Liver Perfusions and Exchange Blood Transfusions. *George M. Abouna, Hiroshi Amemiya, Lyman McA. Fisher, William J. Still, Kendrick A. Porter, Giovanni Costa, and David M. Hume* 1589
Transplantation Proceedings Abstracts 1597
